

#### AMENDMENT TO THE CLAIMS:

Replace the claims with the following rewritten listing:

1. (Original) A method for setting at least one stone having a girdle in a piece of metal, said method comprising:
  - piercing at least one hole in the piece of metal for receiving the stone,
  - placing a stone in each hole,
  - applying a tool perpendicularly to a surface of the piece of metal and close to a periphery of each hole, an end of said tool having a tip for pushing back a lip of metal onto the girdle of the stone, and forming at least one indentation comprising at least one light-reflecting facet.
2. (Original) The method as claimed in claim 1, wherein the tool is applied manually.
3. (Original) The method as claimed in claim 2, wherein the tool is applied mechanically.
4. (Withdrawn) A tool for carrying out the method as claimed in claim 1, comprising at its end at least one convergent surface ending in a tip.
5. (Withdrawn) The tool as claimed in claim 4, wherein the tool has at the end a conical form ending in the tip.
6. (Withdrawn) The tool as claimed in claim 4, wherein the tool has at the end a tetrahedral form ending in the tip.
7. (Withdrawn) The tool as claimed in claim 4, wherein the tool has at the end several facets converging toward the tip.
8. (Withdrawn) The tool as claimed in claim 4, wherein the tip of the tool has a radius of 0.2 to 0.5 mm.
9. (Withdrawn) A product such as a jewel or timekeeper comprising a piece of metal on which is placed at least one stone having a girdle, the product comprising, around at least one stone, at least one indentation having a facet impressed into a surface of the piece of metal, forming a lip that covers the girdle of the stone.

10. (Withdrawn) The product as claimed in claim 9, wherein an entire surface of the piece of metal bounded by two or more stones is impressed with indentations.
